idX Dayton to Grow Facilities, Add 120 Jobs

idX Dayton, the local division of [idX Corporation](#), will invest more than \$7.2 million in a new manufacturing facility and will add 120 jobs over the next four years to its existing workforce of 130.

idX is a leading designer and maker of consumer displays and point-of-purchase environments for the retail, hospitality and financial services industries, with production and office operations in 14 North American locations, Europe and Asia.

The company recently purchased Creative Cabinets on Dayton's Springfield Street and will relocate the local operations to 2875 Needmore Rd (the former Rex Stores headquarters). Production operations there will focus on wood, laminate and metal products.

The former Rex Stores headquarters in north Dayton will be home to 250 jobs when redeveloped by [idX Dayton](#).

The Dayton City Commission approved a \$375,000 development agreement with idX Dayton including \$150,000 in Montgomery County ED/GE funds.

The Needmore Road property is located partially in the city of Dayton, with the remainder in Harrison Township. Dayton's development agreement with idX calls for the property to be annexed to Dayton.
